Backlit Signage

Backlit Signage are display boards generally used for indoor and outdoor application. They are replacements for backlit display boards in use currently that incorporate tubelights, thereby reducing power consumption by more than 50-60%.

LED Tiles/SMD LED Strips are used for lighting
 Very low power consumption
 Inbuilt power supply
 Attractive aesthetics
 No secondary optics used
 Easy installation either with the help of clamps/chain or wall mounting

System Efficiency • > 85%
Power Consumption • 12W
(single tile)
IP Rating • 20
Operating Voltage • 90-270 V AC
